Java

```java
class Solution {
    public long[] findPrefixScore(int[] nums) {

    }
}
```

JavaScript

```javascript
/**
 * @param {number[]} nums
 * @return {number[]}
 */
var findPrefixScore = function(nums) {

};
```

C++

```cpp
class Solution {
public:
    vector<long long> findPrefixScore(vector<int>& nums) {

    }
};
```
